

F-1000

TABLE F-1000

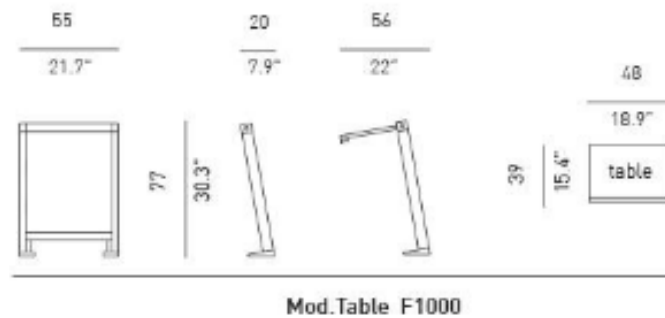

Description

The table F1000 of Figueras is the perfect accessory for turning any seat into an authentic working space. This table is specially designed for its use in auditoriums, conference centres, press rooms, parliaments or educational centres.

The F1000 is an individual-use table, completely independent to the seat area. Its independence with regard to the seat ensures that it is completely stable and is never affected by the movement or vibration caused when the seat in front is occupied.

Thanks to its anti-panic folding system, the table goes into the fold-away position with the movement of the user getting out of the seat. With this folding system, the hall can be vacated quickly and the aisles are always left clear.

The table fits into a drawer composed of aluminium side profiles and panels that come in an upholstered finish. The guide and cart system is located in its interior with an anti-friction bearings system.

Technical Data

- Folds through gravity, with no mechanism and is, therefore, maintenance-free.
- The tabletop inserts into a drawer formed by two columns, within which the movement system is housed.
- Standard useful working space: 39cm x 48 cm.
- Anti-panic folding system.
- The floor anchorage can be direct or via a guide fitted into the floor.
- Installed independently to avoid movement by any other user of the nearby seats.
- The table is designed to house cables and has the option of incorporating a CSI communications box.
