

## Lumio

Light and minimalism in harmony with ease of use.

### Strength in simplicity

The Lumio glazed folding partitions are made up of panels with extremely slimline frames that close to form a fully flat wall with a minimalist look. The invisible, automated locking system adds unrivaled ease of use. The glazed panels are available in a top-hung or a floor-supported version. The final panel of the Lumio comes as a fully transparent door or as a closing panel. This means that the wall can also be used as a temporary inner wall. The Lumio can provide certified sound insulation ratings (Rw) of 40 dB or 42 dB. This glazed folding wall is a highly functional, aesthetically appealing, and easy-to-use space reconfiguration solution.

## Available finishes

As standard the Lumio folding wall has fully transparent glass. The profiles and internal frame are crafted in anodised aluminum, lending the wall a very contemporary appearance. Optionally the supporting internal frames and the aluminum profiles can be coated in a color of your choice. Echo the style of the interior with an etching, print or foil finish, or go for a trendy Crittall effect

## Key features and benefits of Lumio

- Effortless operation.
- A fully glazed folding wall with very narrow frames and slender structure.
- Patented automatic locking system.
- Combination of opaque and glass panels as an option.
- The system's understated design blends with any style.
- The only model on the market with Cradle-to-Cradle Bronze certification.
- No visible screws when the folding wall has been set up.
- Certified sound insulation ratings (Rw) of 40 dB or 42 dB
- Top-hung wall: both endfold: fully in front of or behind one side of the track, to the left and/or right in the opening, and centerfold: below the heart of the track, to the left and/or right in the opening. Floor-supported: centerfold if the structure is not sufficiently strong.
